

MOBILITY AID FOR DOCTORAL STUDENTS

CALL FOR PROPOSALS FOR INTERNATIONAL STAYS

Mindful of the international dimension of research, the École Doctorale de Biologie Santé UBL (ED-BS UBL) wishes to help doctoral students develop scientific exchanges with researchers working in the same field, and thus facilitate their future integration into the international biomedical research community.

The ED-BS UBL offers doctoral students financial support for research stays of at least 1 week in a laboratory or a company located outside metropolitan France, in order to

- perform research within the framework of a new or existing collaboration,
- train in a specific technique.

Scientific conferences and congresses are NOT eligible for aid under this call for proposals.

Due dates of funding opportunities:

Announcement in May for mobility from July to December Submission deadline: June 19, 2018

Announcement in November for mobility from January to June Submission deadline: **February 22, 2019**

This call for proposals concerns doctoral students registered in the ED BS-UBL.

The application file will consist of:

- the "support request" form,
- the "budget" sheet of the mission including the financial participation of the doctoral student's connecting structure in UBL,
- a certificate or letter from the overseas host institution specifying the mobility period,
- a *curriculum vitae* of the candidate,
- a description of the work to be carried out by the doctoral student (1 page) signed by the thesis director and the director of the connecting structure in UBL.

A significant contribution from the doctoral student's connecting structure in UBL must appear in the financial package. Applications will be evaluated by the ED-BS UBL Board, leading to the award of grants up to 50% of the trip's expenditure, capped at 500€ for all international stays.

At the end of the mission, a report of the stay including a one-page summary of the scientific activities, together with a financial report of the mission must be provided by the doctoral student via its connecting structure for payment of the grant.

The complete applications must reach the ED Biologie Santé UBL secretariat via the Director of the student's connecting structure in UBL.
